

Issues for the DOE Rule, 10 CFR 851, “Worker Safety and Health Program”

Don Erbschloe
Office of Science

Joe Yanek
WSRC/EFCOG

April 25, 2006

Overview

- The Worker Safety Rule and its implementation is coming—PSOs need to be prepared and there is a lot of work to be done
- The model will be the nuclear safety process and if sites have robust programs here, it should be straightforward to adapt their programs to ES&H
- Preparation upfront will go a long way to helping contractors with enforcement down the road

Workshop Expectations for the PSO 851 Breakout Groups

- Identify 4 or 5 key issues related to:
 - The development of the written worker safety and health program
 - Implementation of 851
 - Unresolved policy issues
- PSO representatives will report back at Wednesday's 851 panel session
